Itay Binayev
Software Developer

A former soldier who has completed both military service and a software engineering special track for warriors, gaining experience with a range of programming languages and technologies such as **Node.js, React, Angular, C#, .NET**, **Python**, **Javascript** and **SQL**. Seeking a software or full-stack developer role. (**בוגר לוחמים להייטק**)

Software Experience

E-Shop (Like Amazon), MERN ⬈

An Amazon-style e-commerce project using Node.js, Express, MongoDB, and React.js It showcases a sleek interface, seamless shopping cart, and efficient product management

Streaming System (Like Netflix), MERN ⬈

A highly professional project utilizing Node.js, Express, MongoDB, and React.js. The project emulates a Netflix-like platform and incorporates a robust authentication system using JWT

Terminal Simulator, ASP.NET, React and SQL

An ASP.NET and React project demonstrating a web-based terminal with multithreading and SignalR integration for concurrent command execution

Portfolio Website, Next.js and Styled Components ⬈

built a responsive portfolio website with Next.js and Styled Components, showcasing my front-end development skills and commitment to modern web technologies

Education

2022 – 2023	**Software Development Expert Track (לוחמים להייטק), Sela College**
	Completed comprehensive training in software engineering, including in-depth study of node.js, React, Angular, C#, .NET, and SQL

2023	**Certified Project "Diamond" excellent, Sela College**
	Delved deep into object-oriented programming and microservices. studied books such as "NET Microservices Architecture for Containerized .NET Applications," "Microservices Agile Principles, Patterns, and Practices in C#," "Async in C#," "Clean Code," and "Refactoring To Patterns." Additionally, I completed two projects using technologies including Vite, TailWind, JavaScript, React, Next.js, MongoDB, and Express.js

Military Service Golani, 51st battalion
